Powerware CSFi Din Rail Compact Surge Filter

Product Focus

Series Filter with Shunt surge diverter,
1 Phase 3-25A, 25kA Primary

The CSFi is designed for mounting in distribution boards to provide secondary protection against power surges caused by external sources such as lightning strikes and substation switching as well as providing a measure of protection from surge events generated on the secondary side of the filter. An ideal device for Category B locations.

The CSFi is a 3-stage protection unit utilising primary and secondary MOV protection in conjunction with a Low-Q LC filter. The unit provides filtering of the line harmonics, noise and RF transmitters with a cut-off frequency of <math><10\text{kHz}</math> and a nominal attenuation of 45dB.

Features

- Surge suppression and filtering in a single package
- 2 mode, 3 Element Series Filter
- 3 mode, 2 Stage Surge Diverter
- Modular design
- Enclosed in IP 20 ABS plastic housing
- DIN rail mountable (4 pole wide)
- Protection Fail Alarm Relay
- 12 Month Warranty

Typical applications:

- Secondary power circuits, Sub-boards
- UPS Systems and Rectifiers
- Telecommunications Systems
- Process and Control Systems, Homes & Units
- Computer Systems and Medical Systems
- All sensitive Electronic Equipment

All CSFi units are provided with indicators showing power and protection status. Alarms are indicated on the front panel of the unit. The alarm function provides a summary alarm output for protection degradation as well as power failure. The protection alarm is configured to partial protection failure. The summary alarm relay contacts provide remote signalling to other equipment.
